

Department of Electrical Engineering
Indian Institute of Technology, Delhi
Presents a short-term course on

Next Generation Wireless Communication Technologies

July 4 - 7, 2018

Faculty members of IIT Delhi with rich experience in the area of wireless communications and its application will conduct a 4 day course in which the following topics will be discussed:

Cooperative and Cognitive Communications, Energy Harvesting and Wireless Energy Transfer, Massive Multiple-Input Multiple-Output Systems and mmWave Communication Systems.

The four day workshop will train you in fundamentals of Next Generation Wireless Communication Technologies. This short-term course will enable you to teach a course on this topic at your institute, and initiate research activity in related areas.

As per TEQIP norms, travel and accommodation costs will be reimbursed for faculty of all institutes in the TEQIP III quality circle of IIT Delhi.

Venue: Sonapat Campus. Accomodation is available.
